

# **Alarm Installation & Demonstration Service – Multi Product**

Although the SureSafe 24/7 Connect alarm is easy to self-install, we also offer an installation and demonstration service across the majority of the UK.

A SureSafe approved installer will come to your home, show you how to use and program your alarm, set it up for you and then show you how everything works. Have additional peace of mind that an expert has shown you how everything works.

We aim to carry out all installations within 5 working days, we will contact you the next working day to arrange a convenient time. Installations times are between 9 a.m. and 5 p.m. Monday to Friday.
